

At Airline Geosky LLC, we are committed to developing, implementing, maintaining, and continuously improving our quality strategies and processes to ensure that all aviation activities are conducted with a balanced allocation of resources. Our goal is to achieve the highest level of quality while meeting ICAO standards, GCAA requirements, and other applicable international regulations—delivering reliable and efficient services to our clients.

Since establishment in 2017, Geosky has successfully navigated numerous challenges and undergone extensive and high number of State and International Regulatory and Client-oriented compliance evaluations. These continuous efforts have been instrumental in establishing the company's strong position within the international air transportation industry. We are proud of the following key achievements:

- **Member of IATA**, with the designator code **D4**;
- **Certified IOSA Operator**;
- **ACC3 Approved Operator**, registration number: **LV/ACC3/GETBS-GEL**
- **Third Country Operator (TCO)**, code: **GEO-0005**; and *several other recognitions*

In 2025, we look forward to new challenges and continued growth. We plan to expand our fleet with the addition of another **B767** aircraft, reaffirming our commitment to dedicated cargo operations.

As the **Accountable Manager and President of Airline Geosky LLC**, I am personally responsible for ensuring the effective operation and continual improvement of our Quality System. This includes active management involvement in the review and enhancement of our quality practices.

Our Commitment is to:

- Continuously improve Quality Management by allocating the necessary resources to foster a culture of best practices and safety through Quality practices;
- Promote open communication and collaboration across all departments, including contracted services;
- Establish quality management as a primary responsibility for all Nominated Persons, department heads, and employees;
- Clearly define quality responsibilities within individual roles;
- Comply with, and where possible exceed, all applicable legal and regulatory standards;
- Ensure sufficient numbers of skilled and trained personnel to implement and support our quality objectives;
- Provide all staff, including those in contracted services, with relevant and ongoing quality assurance training and information;
- Monitor and improve quality performance through effective management oversight and responsive action;
- Ensure that all contracted services and support systems meet Geosky's Corporate Quality standards.
