

WEBSITE REPORTING RELIABILITY CRITERIA

Anonymous Report Initial Assessment Checklist

No.	Reliability Criterion	Met
1	Valid occurrence date provided	☐
2	Location or operational area identified	☐
3	Safety-related occurrence is clearly described	☐
4	Sufficient factual detail provided	☐
5	Information appears credible and consistent	☐
6	Attached Supporting evidence (if available) appears credible and consistent	☐
7	Potential safety risk identified	☐

Rating	Criteria Met	Assessment Use
High	6-7	Information is sufficiently complete, credible and verifiable for further safety assessment.
Medium	3-5	Information is partially sufficient, the available information should be reviewed and verified as necessary before or during further safety assessment.
Low	0-2	Information is insufficiently complete or verifiable to support further safety assessment without additional information or corroboration.
